Kayak Stow & Go®

Patent #9,592,893

The Kayak Stow & Go® by Kroeger Marine

Our exclusive, patented Kayak Stow & Go® is a dockside storage and launch system for kayaks that makes accessing your kayak much safer and more enjoyable. The frame is designed to keep the stored kayak in an angled Kayak Stow & Go® position so no rain gets inside, and it's stored above the water line. Options are available for canoes and paddle boards, all of which can easily be mounted to your existing dock.

Key Features:

- 1 Provides quick, safe, and easy access to your kayak from your dock
- 2 Step design allows for a steady platform for getting in and out of the kayak dockside
- 3 Stow & Go system ties into dock frame or spans many deck boards to prevent damage to decking
- 4 Angled storage prevents rain collection
- 5 System keeps kayak stored above the waterline
- 6 Capability to easily raise and lower in and out of the water, with winches options also available
- 7 Reversible Hoop allows for the system to be easily set up for landward or lakeward entry
- 8 Patented, high-quality aluminum design with stainless steel hardware and brass nuts, all rust-resistant and available only through Kroeger Marine
- 9 Hoop also functions as a grabrail for additional stability when entering and exiting
- 10 Also available for canoes and paddleboards
- 11 Ideal for all ages
- 12 Easy to follow installation instructions

Dimensions:

KAYAK VERSION:

- Step size: 30" x 8" (width x depth)
- Overall bracket width: approx. 34"
- Hoop dimension: 32" x 20"
- Overall horizontal dimension deployed: 52"
- Step adjustment up to 2' below deck level, in 4" increments (set with lower hoop submerged 2")
